

Sturts Community Trust

Sturts Community Trust is an exciting venture bringing together a range of social initiatives built around a vision of promoting sustainability. We have our base on Sturts Farm, a 90 acre working organic biodynamic farm on the outskirts of West Moors. As a Camphill Community, Sturts Farm offers land-based work opportunities, individualised support and supported living for adults who have a learning disability. Our vision is to promote opportunities in land-based activities, including on our farm, in our garden and by providing allotment spaces; opportunities for lifelong learning based around the themes of sustainability, food and the arts; to offer opportunities to benefit from accommodation within our co-housing project; and to offer individuals the level of individualised support they need. In our lifelong learning centre you can gain qualifications in gardening, farming and cooking, and learn craft skills to work with wood, metal and leather.
